

Some Key Lesson Learned from the e-India 29-31 July,2008, New Delhi, india

1. Variety of Telecentres' Types

No need to have a huge numbers of all hi-tech equipments once its could serve themselves effectively.....

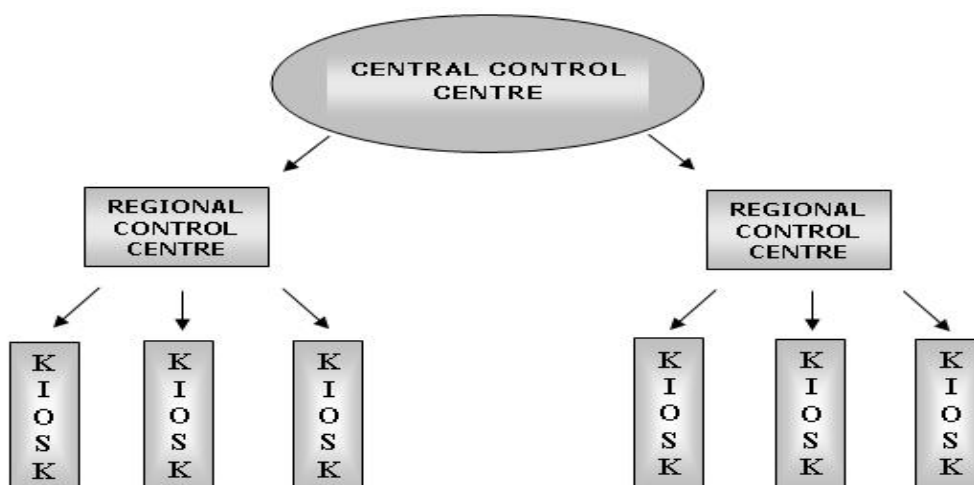

Concise and Compact Indian Telecentre

Applicable to Serve Their Own People....

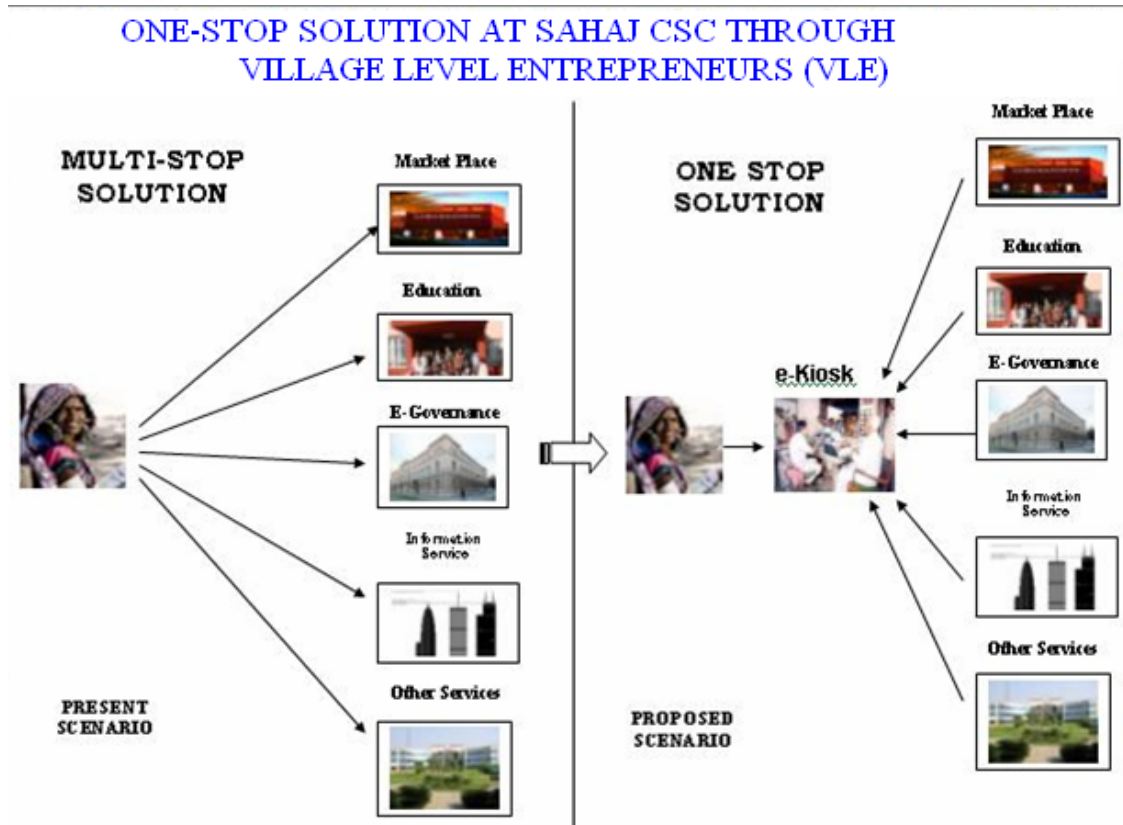

2. Participatory and Multi-functions Type

No more top-down or single strategy, we need to share and participate more with the network strategies....

3. Telecentre has to Serve their Life's Needs as the One Stop Services Centre

Ask them what they want, then help them to serve themselves.....

4. Digital Gap is the Global Issue

The Telecentre.org has implementing the "Telecentre.org Academy" as the curriculum Commons Grant aimed to empower the Telecentre's operators all over the globe within this **29 Aug.08**.

6. ITU has also launched the Web Telecentre Global Portal

ITU has launched the global view portal to serve all update, knowledge and know how, etc. to any telecentre globally..... : WWW.ITU

Welcome to the ITU Global View Telecentres Portal

Besides, there are still some further lesson learned and best practices shared among all the global telecentre networks..... will keep updating you all....
